With summer weather quickly approaching, heat related illness prevention and management will be monitored more closely from May 15th to September 15th. Care strategies are implemented to ensure the safety of your loved one. Residents are encouraged to access the outside areas in good weather and receive instruction on how to use the exit/entrance push buttons. When under a weather advisory, residents are requested to remain indoors. If they choose to go outside, they are monitored and encouraged to have adequate fluid intake. Each home area is served by air conditioning ensuring a comfortable temperature.
